Replied on Comments for FYP Presentation

Sr. #	Comments	Replied
1	No App Logo	Integrated a custom App Logo into the system's main header and sidebar for professional branding.
2	No Correct App Name	Updated the app name to "Sales Oracle" across the entire system.
3	No FAQs	Designed and integrated a comprehensive Frequently Asked Questions (FAQ) section addressing data requirements, model accuracy, and core system features.
4	No About sections	Developed a detailed 'About Sales Oracle' module explaining the core value, AI architecture, and business benefits for end-users.
5	No real type of sales data	Validated the forecasting pipeline using a real-time, high-volume retail to ensure system scalability.

University of South Asia

6	Improve Model Accuracy	Enhanced the model accuracy from 87% to 91% with accurate predictions.
7	Layout congestion upon file upload	Fixed layout overlapping by isolating the Landing Page before upload.
8	Readability bugs in expandable sections	Fixed CSS bugs in expanders for clear text visibility in all themes.
9	Dark visibility issues	Switched default theme to Light Mode for better readability.
10	Readability bugs in FAQs	Fixed CSS bugs in expanders for clear text visibility in all themes.
11	Charts overlapping	Fixed chart overlapping by displaying revenue and profit side-by-side.
12	Model predictions lacking trust	Added an AI Confidence Score based on historical data alignment.
